

History of Polygraph Examination

Table of contents (Spis treści):

Chapter 1. Preliminary questions

- 1.1. The lie
- 1.2. The first attempts at recognising lies
- 1.3. Initial assessments of behaviour and facial expressions of a person under interrogation or participating in a search

Chapter 2. First scientific grounds for lie detection

- 2.1. Experimental psychology
- 2.2. Physiology
- 2.3. Emotions and methods for studying them
 - 2.3.1. Introduction to the issues of emotional changes
 - 2.3.2. Emotions and emotional processes. The physiological mechanism of emotions. The first attempts at observing and recording the physiological correlates of emotions for non-medical purposes
 - 2.3.3. Somatic changes (physiological correlates of emotions), facial expressions, gestures and postures, and verbal and behavioural symptoms accompanying emotions

Chapter 3. First attempts at lie detection based on scientific premises

- 3.1. Word Association Test
- 3.2. First attempts at instrumental lie detection based on the observation of physiological correlates of emotions
 - 3.2.1. Lie detection based on plethysmograph indications
 - 3.2.2. Attempts at detecting lies based on changes in breathing
 - 3.2.3. Attempts at lie detection based on the assessment of changes in the cardiovascular system
 - 3.2.4. Attempts at lie detection based on observation of muscular tension and tremors
 - 3.2.5. Attempts at lie detection by observing changes in electroencephalograms
 - 3.2.6. Attempts at using the galvanic skin response for lie detection

Chapter 4. The first attempts at the practical use of instrumental lie detection

- 4.1. William Moulton Marston. Attempt at lie detection based on blood pressure measurement
- 4.2. John Augustus Larson and his polygraph
- 4.3. Clarence D. Lee and Leonarde Keeler: successors to Larson. The “Californian era” of the polygraph continues
- 4.4. The beginning of the “Chicago era” of the polygraph
- 4.5. The polygraph during and immediately after the Second World War

Chapter 5. Polygraph examinations in the US and other countries after the Second World War

- 5.1. John Reid. A new era in polygraph examinations in the US
- 5.2. David T. Lykken and his criteria of control questions techniques
- 5.3. Conflict with Lykken

Chapter 6. Development of the control questions technique. New methods of interpreting polygraph charts

- 6.1. The Backster technique
- 6.2. Shortcomings of the qualitative (visual) interpretation

of reaction charts

6.3. Numerical (quantitative) interpretation of reaction charts

6.4. Backster's influence on polygraph examination techniques

6.5. Perfecting the equipment

6.6. Attempts at lie detection based on voice change analysis

6.7. Attempts at unification of standards

Chapter 7. History of polygraph examinations in Poland and selected countries

7.1. History of polygraph examinations in Poland

7.2. History of polygraph examinations in selected countries

Conclusion
